

# STEM CELL ACTIVATION TECHNOLOGY

## HISTORICAL BREAKTHROUGH THAT ACTIVATES EXISTING STEM CELLS

- As we age, our stem cells decline in their ability to function and heal our bodies
- LifeWave's X39® stem cell activation patches are clinically proven to provide the body with a level of health and vitality that many have not experienced in years
- The secret? An exclusive, patented and proven phototherapy non-transdermal patch technology that is safe, non-invasive and easy to use
- LifeWave's X39® is the result of over 80 clinical studies and 20 years of research
- When this wearable technology is applied to the body, the X39® phototherapy patches are activated by your body's heat
- X39® reflects specific wavelengths of light back toward the body, signaling the body to elevate the GHK-Cu copper peptide.
- GHK-Cu has been clinically proven to activate your body's own stem cells
- LifeWave is the world's first and only company using this patent-pending approach to activate stem cells
